Michael James Campbell, M.D.

Philosophy of Care

My philosophy of care is to treat every patient how I would want my own family treated. I believe that each patient deserves to be taken care of with compassion, respect, and a commitment to deliver the best care possible. I am dedicated to providing a multidisciplinary approach for my patients bringing together the vast resources of the UC Davis Health System to formulate a shared, patient-centered plan. There is no "simple" operation when you are the patient.

Clinical Interests

Dr. Campbell is a fellowship-trained endocrine surgeon who specializes in the surgical treatment of patients with thyroid, parathyroid, adrenal and pancreatic disorders. He is an expert in minimally invasive parathyroid and thyroid surgery as well as complex laparoscopic adrenal surgery. He offers a wide range of unique services including laparoscopic adrenalectomy; minimally invasive and reoperative thyroid and parathyroid surgery; and complex lymph node dissections.

Research/Academic Interests

Dr. Campbell's research interests include improving multidisciplinary care for endocrine patients; improving the evaluation of incidental adrenal tumors, patient outcomes following thyroid surgery; recurrent and persistent hyperparathyroidism; and familial endocrine disorders (such as multiple endocrine neoplasia).
