Join us as we celebrate the successful transformation of courageous individuals

Each year, the UC Davis Bariatric Surgery Program spotlights bariatric patients as they model fashions for business, leisure and formal occasions. This year's event features men and women who have lost weight in the months following gastric bypass, vertical sleeve gastrectomy or laparoscopic band operations. Models will share brief personal stories and photos from their battles with extreme weight, and then walk the runway in the latest fashions from local clothing stores. Proceeds benefit education and outreach programs of the UC Davis Bariatric Surgery Program.
