ABOUT THE CONFERENCE

The 17th Annual Nephrology & Transplantation Conference is a one day in-person educational event for multidisciplinary professionals involved in the care of patients with Chronic Kidney Disease (CKD) and/or End Stage Renal Disease (ESRD). Multidisciplinary professionals who would most benefit from this education event are: General Nephrologists, Licensed Clinical Social Workers (LCSW), Registered Dietitians (RD) and Registered Nurses (RN). This year the focus will be Meeting the Challenges of Executive Order, signed by President Trump in July 2018 that outlines three goals for advancing kidney care in America: a) reduce the number of Americans developing end-stage renal disease, b) increase the number of patients either receiving dialysis at home or receiving a kidney transplant and c) doubling the number of kidneys available for transplant. This educational event will provide an overview of the Executive Order with specific focus on increasing access to kidney transplantation and overcoming barriers to living donor kidney transplantation.
