Dr. Moshiri joins the UC Davis faculty after completing his fellowship in vitreo-retinal diseases and surgery at the Wilmer Eye Institute at Johns Hopkins University, where he also completed his residency in ophthalmology. His commitment to academic medicine is founded on his scientific interest in retinal genetics and retinal stem cell biology, and he pursues an active laboratory research program. His clinical expertise includes all diseases of the retina, including macular degeneration, diabetic retinopathy, and retinal detachment. He has a special interest in hereditary retinal diseases such as retinitis pigmentosa, Stargardt disease, and other related genetic conditions.

TRAINING

1994 - 1997	BS	Chemistry Major University of California, Berkeley Berkeley, CA
1998 - 2006	MD/PhD	University of Washington, Seattle Seattle, WA
2006 - 2007	Internship	Transitional Program University of Texas, Houston Houston, TX
2007 - 2010	Residency	Ophthalmology Residency Wilmer Eye Institute, Johns Hopkins University Baltimore, MD
2010-2012	Fellowship	Vitreoretinal Surgical Fellowship Wilmer Eye Institute, Johns Hopkins University Baltimore, MD

SELECTED HONORS AND AWARDS

2010-2012	The Mary Hutcheson Retina Fellowship Award Wilmer Eye Institute, Johns Hopkins University School of Medicine
2011	The Arnall J. Patz Research Grant Award Wilmer Eye Institute, Johns Hopkins University School of Medicine
2009	The Ray Sjaarda Research Grant Award Wilmer Eye Institute, Johns Hopkins University School of Medicine

INTERESTS AND EXPERTISE

Diagnosis and management of all aspects of medical and surgical retinal diseases, with a special interest in genetic diseases of the retina.
