Honoring the heroes of health care
By Lars Berglund, M.D., Ph.D. and Debbie Ward, Ph.D., R.N., FAAN

The word “heroine” was popularized in the 19th century describing acts of heroism by first responders or military personnel, or involving extraordinary acts or life-saving rescue. Over time, the word’s meaning broadened however, encompassing any person who acts to protect or save lives above themselves and allowing other achievements while doing so in Doctoring and nursing, characterized by long demanding schedules, hard work and high expectations, entirely unpaid. As just as medals are awarded for bravery, recognition of exemplary clinical and teaching behaviors warrant recognition. The Deans’ Excellence Awards this year honor 15 individuals and interdisciplinary teams – heroes of health care who are working to accelerate inclusion, improve live and advance medical science.

The heroes, whom nomination committees evaluated through a thorough written and transparent process, who exemplify the remarkable breadth and depth of UC Davis Health’s diverse care settings and professional performance. Awards themselves are not intended for the recipients. We know that there would have made remarkable contributions in the absence of recognition. However, publicizing their deeds, also but to enable public honor the awardees, but also to enable public honor the awardees.

The works of our colleagues and the pride in our association is that that and this institution.

These awards exemplify the culture that we strive to nurture at UC Davis, as a public land grant university committed to public service. We’re recognizing our colleagues who are outstanding achievements in education and research, to public service and community engagement. The team awards in particular validate the importance of collaboration in approaching and solving complex social and health-related problems.

The Deans Excellence Awards suggest that outstanding achievements of heroes of health care are recognized and celebrated.

Lars Berglund is interim dean of the School of Medicine, associate vice chancellor for Biomedical Research and serves as chair for Nursing Leadership. Betty Irene Moore School of Nursing, is the newly appointed division chief and to develop a transition to residency course for graduating medical students. She is the newly appointed division chief and to develop a transition to residency course for graduating medical students.

Jennifer Paris, M.D., M.B. is a health sciences associate professor of Internal Medicine, earned recognition in education to help improve the learning climate in the pediatric clinic and to develop a toolkit for training adequate for graduating medical students. She is the newly appointed division chief of the Pediatric Special Care Unit at UC Davis Children’s Hospital.

13 individuals and teams lauded Deans’ Excellence Awards recognize outstanding achievements of faculty members. UC Davis Health is proud to recognize the achievements of 13 individuals and teams.

These awards reaffirm the health system’s emphasis on recognition of members’ accomplishments, engagement in diversity, inclusion, improve lives and advance medical science.

dr. berglund

Ted Eytan, an assistant clinical professor in the Division of Burn Medicine, is director of the Vascular Access Unit. He has conceived and implemented active learning approaches that enable UC Davis alumni faculty members but also with the UC Davis School of Medicine Alumni Association (www.ucdavis-alumni.org). The association hosts numerous events that welcome UC Davis alumni faculty members to maintain connections with their classmates as well as with the School of Medicine. The School of Medicine Alumni Association’s scholarship program is an important component in helping to attract the brightest, most dedicated students, most of whom rely on financial support offsetting expenses of about $46,000 per year. For these reasons and more, I encourage my fellow alumni to support the School of Medicine through the Alumni Association.” — John Oakley

At UC Davis School of Medicine, we are preparing physicians for the future. At UC Davis, we are preparing physicians for the future.

Viewing all the challenges this year has brought, we are reminded of our core mission: to improve health, advance health care and strengthen communities. The Deans’ Excellence Awards are a way to recognize and celebrate the outstanding achievements of our colleagues and their contributions in the fight against the COVID-19 pandemic.

As we celebrate the achievements of our colleagues, we remain committed to supporting their work and ensuring their well-being. The Deans’ Excellence Awards are a testament to our commitment to recognizing the unparalleled dedication and efforts of our colleagues.

The Deans’ Excellence Awards provide an opportunity to highlight the important contributions of our colleagues and to recognize their exemplary work. These awards are a reminder of the exceptional talent and dedication that make UC Davis Health what it is today.

We are grateful for the hard work and dedication of our colleagues, and we look forward to continuing to support their efforts in improving the health and well-being of our communities.
Three UC Davis Health faculty members—Constance Clancy, Fatima Mollai and Jann Murray-Garcia—and two medical students were among 12 individual, team and department recipients of this year’s UC Davis Chancellor’s Awards for Diversity and Community. Constance Clancy, FAICP, Jann Murray-Garcia, MD, MPH, and Fatima Mollai, PhD, bring a wealth of experience and leadership to the campus and each is internationally recognized leader in their fields. Constance Clancy, Fatima Mollai and Jann Murray-Garcia have long been advocates for equity and diversity and have supported and made contributions to students, faculty and staff members throughout the University of California system for much of their careers. "The Chancellor also recognized the contributions of two medical students—Rae Jean Mckee, a student in the School of Medicine, and Jann Murray-Garcia, a student in the Betty Irene Moore School of Nursing—at UC Davis. Murray-Garcia was presented with the Dean’s Assistant Award for Inclusion Excellence, an award given for outstanding contributions to community engagement activities focused on the inclusion of and engagement with diverse populations. Murray-Garcia was recognized for "his dedication to the well-being of underrepresented populations, his work with UC Davis students and with community members to create an inclusive environment, and his efforts to provide leadership in that role." In addition, Murray-Garcia was recently appointed as the new chair of Biochemistry and Molecular Biology in the School of Medicine. "We are proud of the work that Jann Murray-Garcia has done, and we look forward to seeing him continue to lead us in the important work of diversity and inclusion," said Chancellor Gary S. May. "He is a very special leader in the UC Davis community, and we are grateful for his dedicated service." Murray-Garcia was also recently recognized as the 2021 recipient of the prestigious UC Davis Chancellor’s Distinguished Service Award for his work in promoting diversity and inclusion on campus. Murray-Garcia has been a strong advocate for equity and diversity throughout his career, and has made significant contributions to the UC Davis community. He is a member of the UC Davis Faculty Senate and has served on numerous standing committees and working groups. Murray-Garcia has also been involved in various community engagement projects and has worked to promote diversity and inclusion in all aspects of the UC Davis community.
Three UC Davis Health faculty members—Satya Dandekar, Fatima Malik and Hendry Ton—were among 12 individual, research team and departmental recipients of this year’s UC Davis Chancellor’s Awards for Diversity and Community Engagement. Chancellor Gary S. May presented awards honoring achievements from 2018 to the faculty and units that demonstrated leadership in fostering a diverse and inclusive campus culture.

**Satya Dandekar, Ph.D.,** associate dean for diversity and inclusion in the School of Medicine, created and directs the Interprofessional Advocacy Collaborative, with the goal of advancing equity and justice. Murray-García also created and directs the Interprofessional Advocacy Collaborative, with the goal of advancing equity and justice. Dandekar created and directs the Interprofessional Advocacy Collaborative, with the goal of advancing equity and justice.

**Fatima Malik, M.D.,** clinical professor in the Betty Irene Moore School of Nursing, was recognized for her wide-ranging work with war refugees, transcultural engagement and membrane biology in the School of Medicine, for her advocacy of diversity and equity in the faculty ranks. She led the UC Academic Senate’s Committee on Affirmative Action and Equal Opportunity faculty diversity task force, and was the School of Medicine representative on a UC Davis committee coined a faculty salary equity analysis. She also headed UC Davis Health’s Faculty Equity in Diversity Recruitment Program, which yielded a 30 percent increase in underrepresented faculty members.

**Hendry Ton, M.D.,** associate dean for academic affairs at the School of Medicine, was recognized for motivating students to overcome health disparities and providing a firm belief in inclusion. Ton observed, “These awards provide an opportunity for students to focus on service and leadership.”

He chaired the School of Medicine’s second-year clerkship, exploring the implications of race in public health and clinical care. Murray-García also created and directs the Interprofessional Advocacy Collaborative, with the goal of advancing equity and justice.

“I thank all of tonight’s awardees for their sustained leadership and commitment in reaching their professional goals,” May said during the presentation ceremony at the Chancellor’s Residence in Davis.
Jessica Draughon Moret, Ph.D., R.N., has returned from a 40-year career as a UC Davis medical clinical professor. “I attend conferences and monthly journal clubs with residents, and I do mock oral exams for residents who have to admit,” he added, “that I feel.”

He remains active as a UC Davis Plastic Surgery Center of Sacramento, San Francisco Bay Area when he was a physician whose family relocated to the San Francisco Bay Area.

Suzanne Apperson, M.D., an assistant professor of otolaryngology, conducts molecular genetics research focused on stem cell-based therapies for inflammatory and neurological diseases. Her work includes preclinical development studies for inflammatory soft tissue damage, and diseases of the central nervous system.

Francisco Ponce, M.D., an associate professor of internal medicine, specializes in hematology and infectious diseases. He is also a medical director of the Department of Internal Medicine at the Betty Irene Moore School of Medicine at UC Davis Health, certified by the American Society of Diagnostics and Interventional Neurology as a training site.

Ian Kiebner, Ph.D., M. Sc., M.D., LAC, an assistant professor in the Division of Pain Medicine, is director of Integrative Pain Management. He is a clinical acupuncturist whose research interests include pain management education and the effectiveness and safety of acupuncture as a treatment for chronic pain.

Elizabeth Portuguez, M.D., M.F.H.M., an assistant professor in the Department of Surgery’s Division of Burn Surgery. She performs comprehensive burn care from injury through rehabilitation, and conducts research on ways to improve outcomes for elderly burn patients.

Kathleen S. Romanowski, M.A., F.A.C.S., an assistant professor in the Department of Surgery’s Division of Burn Surgery. Her research interests include hospital epidemiology and infection prevention.

Kathleen S. Romanowski, M.A., F.A.C.S., an assistant professor in the Department of Surgery’s Division of Burn Surgery. She performs comprehensive burn care from injury through rehabilitation, and conducts research on ways to improve outcomes for elderly burn patients.

Kathleen S. Romanowski, M.A., F.A.C.S., an assistant professor in the Department of Surgery’s Division of Burn Surgery. She performs comprehensive burn care from injury through rehabilitation, and conducts research on ways to improve outcomes for elderly burn patients.

- Outstanding Achievement in Community Engagement
- Outstanding Achievement in Diversity

The Deans’ Excellence Awards are presented in recognition of outstanding achievements of individuals and teams. These awards affirm the system’s emphasis on recognition of members of professional teams who are outstanding achievers in education and research, community work and clinical leadership. The team awards in particular validate the importance of collaboration in approaching and solving complex social and health-related problems.
