

UC Davis Home Health Wish List

The Home Health Program at the University of California at Davis offers the opportunity for patients to receive skilled medical care in the comfort of their home. Members of the Home Health care team work collaboratively with physicians to provide the highest level of patient-centered care. The goal of the Home Health program is to provide patients with the knowledge and skills necessary to achieve maximum functioning and independence at home.

During this time, many patients have needs that are not covered by insurance or cannot be purchased by the family. To meet this need, UC Davis Home Health has created the following list of items that can help a family in need. Contact Michele Steiner, associate director of development, at 916-734-9116 or michele.steiner@ucdmc.ucdavis.edu with questions. Purchased items are tax deductible and can be sent to:
