

Time to get your flu vaccine

Why get vaccinated? As flu season approaches, it's crucial to protect yourself and others. Occupational and Employee Health Clinic (OEHC) is offering free flu vaccines to help prevent severe disease and hospitalization among staff, students, and faculty. Last year, our vaccination rate dipped to 79.9% due to overall vaccination fatigue. This year, our target is to achieve an 85% vaccination rate. Those who decline to receive the vaccine will be mandated to wear a medical-grade mask in all settings starting Nov. 1 throughout the entire flu season (typically through April).

By Nov. 1, all UC Davis Health staff and faculty must receive their flu vaccination or submit a declination form. Those not in compliance will be escalated to Employee and Labor Relations and will not be permitted to work or train at UC Davis Health per Policy 2175.

Eligible groups

- Employees
- UC Davis Medical students, with a badge
- Temporary Employment Services (TES) Workers
- Volunteers through Volunteer Services only

**Please note: Betty Irene Moore School of Nursing students and the UC Davis employees working on the Sacramento campus must receive their flu vaccination through a third party (Rite Aid, CVS, Walgreens, etc.) or their primary care physician.*

Compliance deadline

By Nov. 1, 2024, employees must have completed one of the following:

- Received the flu vaccine through an Employee Flu Vaccine Clinic
- Participated in the self-administration program with your department/unit
- Received the flu vaccine from another facility and uploaded approved proof of vaccine. For more information, click the Employee Flu Vaccination button on the *Insider*.
- Declined to receive the vaccine via the online form. For more information, click the Employee Flu Vaccination button on the *Insider*.

Please direct all questions to hs-ehsflunotify@ucdavis.edu
