## 2024 Northern California Structural Heart Summit

### Life before and after TAVR

Gary Lee

# Learning Objectives

- **Understand the progression of aortic stenosis and its impact on quality of life prior to TAVR**
  - Explore the symptoms, limitations, and clinical considerations that lead patients to be candidates for TAVR.
- **Examine the TAVR procedure and immediate post-operative care**
  - Discuss the TAVR procedure itself, including patient selection, procedural techniques, and early recovery expectations.
- **Evaluate long-term outcomes and quality of life improvements after TAVR**
  - Review data on patient outcomes, including functional recovery, symptom relief, and long-term quality of life following the procedure, as well as ongoing management considerations.

## Stevens-Johnson Episode

# THANK YOU
