

Help Waste Find Its Place

Identi-Hide Labels: Cover PHI Prior to Disposal

Know Where It Goes!

Lawson Order Information:

- 147408 – 4"x3" labels
- 190505 – 4" x 1" labels
- 190506 – 3" x 2" labels

Identi-Hide labels are used to render printed protected health information (PHI) unreadable prior to disposal. They have heavy black text in a repeating pattern to obscure PHI, they show if a label has been tampered with once applied, and have strong adhesives to keep them in place.

Suggestions for use:

- Stock labels near points of waste disposal
- Stock label sizes that will fully cover PHI
- Press label down firmly for at least 5 seconds once applied
- After application, dispose of items as you normally would

Contact Environmental, Health, and Safety (EH&S) before you implement any process change related to this information.
