

# Identi-Hide Labels

## Cover PHI Prior to Disposal

Identi-Hide labels are used to render printed protected health information (PHI) unreadable prior to disposal. They have heavy black text in a repeating pattern to obscure PHI, they show if a label has been tampered with, and they have strong adhesives to keep them in place.

### Suggestions for use:

- Stock labels near points of waste disposal
- Stock label sizes that will fully cover PHI
- Press label down firmly for at least five seconds once applied
- Once label is applied, dispose of items as you normally would

### Lawson Order Information:

- 147408 – 4” x 3” labels
- 190505 – 4” x 1” labels
- 190506 – 3” x 2” labels
