

# Avoid Overfilling Waste Bins!

Waste bins are full when they reach capacity which is identified by the fill line on the container or when approximately 3/4 full. Waste should not stick out or overflow over the top of the bins.

Work with EVS/Hospitality/Waste Vendor/Supervisor to adjust waste bin sizes or pickup frequency if overfilling occurs regularly or if items do not fit in the bins.

Identify peak waste generation periods and ensure the waste bin size accommodates these spikes.

**Help waste find its place!**
