

# Identi-Hide Labels Cover PHI Prior to Disposal

Identi-Hide labels are used to render printed PHI unreadable prior to disposal. They have heavy black text in a repeating pattern to obscure PHI, they show if a label has been tampered with, and have strong adhesives to keep them in place.

Suggestions for use:

- Stock labels near points of waste disposal
- Stock label sizes that will fully cover PHI
- Press label down firmly for at least five seconds once applied
- Once label is applied, dispose of items as you normally would

**Help us make sure that waste finds its place!**
