

Plain Injectable Solutions – Plain Down the Drain

Select plain injectable solutions within IV Bags are permitted to be drained down the hopper or dirty sinks

Upon drainage, empty IV bags may be disposed of in a regular municipal trash bin. Be sure to remove or cover any protected health information (PHI) before placing them in the trash.

Note: IV bags that contain medication or any visible blood must **not** go in the regular trash. Dispose of these bags in the appropriate blue pharm/sharp or red biohazardous waste bins, respectively.

Help Waste Find Its Place

Do not place regulated items in the municipal trash. We must do our part to properly segregate our waste.

If you are unsure where a waste item goes, reach out to EH&S for assistance.
