

HEALTH CLEARANCE CONTRACTOR/STUDENT REQUIREMENTS

UC DAVIS HEALTH

Requirements of UC Davis Health include, but are not limited to the following:

Mandatory MEASLES (RUBEOLA) Criteria:

Proof of immunity to measles. Acceptable criteria:

- Positive serology for Antibody to Measles is required (**copy of lab slip**).
- OR**
- Documentation of **TWO** measles shots in lifetime at least 28 days apart.

Mandatory RUBELLA (GERMAN MEASLES) Criteria:

Proof of immunity to Rubella. Acceptable criteria:

- Positive serology for Antibody to Rubella is required (**copy of lab slip**).
- OR**
- Documentation of **TWO** immunizations for Rubella (**MMR, MR, Rubella immunization**).

Mandatory TUBERCULOSIS (TB) Criteria:

- Evidence of PPD skin test results within 1 year. **TWO** Step required with second test within 90 days or Quantiferon lab result within the last 12 months.
- If individual is already PPD Positive:
Evidence of a chest x-ray within the last 90 days and interview the individual for TB symptoms (symptom interview).

**TB clearance is required annually for all health care providers by either a skin test or a symptom interview.*

Mandatory or declination SEASONAL FLU VACCINE – is required yearly.

- *Evidence of vaccination during flu season (roughly Nov 1st to April 1st) or declination. If declined -masking is required in all environments.*

Mandatory VARICELLA (CHICKEN POX) Criteria:

Proof of immunity to Varicella. Acceptable criteria:

- Varicella (VZ) by serology, not history (**copy of lab slip**).
- OR**
- **TWO** Varivax injections (28 days apart) – will be given quarantine policy if non-immune.

Mandatory MUMPS

Proof of immunity to Mumps. Acceptable criteria:

- Documentation of **TWO** MMR's in a lifetime.
- OR**
- Positive serology antibody for mumps (**copy of lab slip**).

Mandatory or declination Hepatitis B

- **THREE** doses of Hepatitis B Vaccine or **TWO** doses of Heplisav-B.
- Hepatitis B Surface antibody test with numerical value (CDC states a quantitative number value of '10' represents life-time immunity – lab values that are positive – may or may not reflect this).

Mandatory TETANUS, DIPHTHERIA AND PERTUSSIS VACCINE (TDAP) within the last 10 years.
