MMI 291 Seminar Series
Current Theme: Interdisciplinary Research
Winter Quarter – CRN 65452

Friday Seminar – 12:10-1 p.m.
SEMINAR LOCATION: GLADYS VALLEY HALL ROOM 1047

“Dust Devil or Fantastic Yeast?
The Mysterious Life of Coccidioides”

Research

The Barker Lab is striving to improve our knowledge of the ecological niche of Coccidioides by improving our ability to predict the presence of Cocci in soil. Being exposed to Cocci often leads to an asymptomatic infection but can lead to the development of asymptomatic benign nodules, sometimes misdiagnosed as lung cancer. If the acute infection does not resolve, it can progress to chronic and/or disseminated disease, and the specific factors influencing this outcome are unknown.
