Chemical Inventory Certification

All UC Davis chemical inventories should be managed in UC Chemicals and certified as accurate annually - by Jan. 15.

Please verify the accuracy of your inventory and then:

1. Login to the Chemicals application at ehs.ucop.edu/chemicals/

2. Select Inventory Summary

3. Select Certify Inventory, on the right side of the page.

You should then see a green check mark along with the date you certified the inventory as accurate.
