Online Kids First Autism Study
Now recruiting research participants

Are you a parent of a child with autism?

The UC Davis MIND Institute invites you to participate in the Kids First Study, supported by the Hartwell Foundation. Your responses to simple behavioral and medical questions help MIND Institute and other leading autism researchers better classify autism spectrum disorder (ASD) to more accurately reflect each individual’s behavior and personality. With this new approach, researchers hope to be able to dig beyond the surface features of the disorder, to enact personalized, targeted approaches for care and interventions that may be more successful than what is available today.

Who can participate?

Parents of a child with:

▪ Autism Spectrum Disorder (ASD); and  
▪ Is between the ages of 12 months and 17 years; and  
▪ Is proficient in the English language

What does the study involve?

All participating families will:

▪ Be asked to enroll in an online database; and
▪ Complete a survey with simple behavioral and medical questions.

All participation is online.

What else can be expected?

▪ At the completion of the survey, families will have access to an online resource dashboard; and
▪ Will be able to see their child’s information as it compares to other participants

This study is in collaboration with:

THE HARTWELL FOUNDATION  Stanford MEDICINE  Case Western Reserve UNIVERSITY

For participants’ rights questions please contact Stanford University Institutional Review Board at 866-680-2906.

PARTICIPATE TODAY!
