

The University of California, Davis Medical Center is located in the Sacramento Metropolitan area and has access to the population of patients from the central valley. UC Davis is the only level I trauma center in the central valley and as such manages many spinal fractures. In addition, each of our surgeons maintains a busy elective practice that focuses on cervical, degenerative and deformity in both adults and children.

The spine service's goal is to offer the fellows as much independence as possible with appropriate faculty backup. The fellows should learn decision making, operative techniques, and how to take care of unexpected complications.

The fellowship begins **August 1st** and ends **July 31st** of each year. Compensation for PGY6 is \$68,964/year with excellent benefits.

Individuals interested in applying for the Spine fellowship should apply through the SF Match Program at www.sfmatch.org.

Individuals with questions regarding the UC Davis Spine Fellowship should call **916-734-2937**.

All fellowships require licensure in the State of California. If you have questions about California requirements, please visit:

The Medical Board of California

Department of Orthopaedic Surgery University of California, Davis School of Medicine

Our Vision

To be the nation's leader in orthopaedic excellence. We will lead national research innovation, education, and excellence in orthopaedic surgery that contributes to better mobility and quality of life for patients.

Our Mission

To leverage one of the nation's richest orthopaedic research environments, multidisciplinary collaborations unique to UC Davis and our outstanding faculty to enable compassionate patient care, ground-breaking innovations and superior training for existing and future generations of orthopaedic surgeons.
