"Health Care Serial Murder – the Patient Safety Problem No One Wants to Talk About."

Objectives:
1. Describe what is meant by “health care serial murder” and list at least three of its defining characteristics. Be familiar with a range of potential applications of total-body PET scanners.
2. Discuss three reasons why modern health care makes it difficult to detect health care serial murder.
3. Identify what is the most common method used to commit health care serial murder in the United States.
