Objectives:
1. Compare and contrast the Flexnerian model for undergraduate medical education with a common 21st century model for undergraduate medical education.
2. Describe the current UC Davis School of Medicine curriculum and key areas for potential change.
3. Explain the curriculum redesign process underway at the UC Davis School of Medicine.
4. Identify topics that should be of greatest emphasis in the undergraduate-graduate-continuing medical education continuum.

“Modernization of the Medical School Curriculum: National Trends and the UC Davis Experience.”
