

Management of patients on oral anticoagulants with bleeding or needing an urgent invasive procedure

†See Anticoagulation reversal guideline for dosing recommendation. Balance of KCentra dose based on INR can be given if bleeding is still a concern

Call the Anticoagulation, CPCS Service, or ED Pharmacist for use

Activated charcoal, Idarucizumab 5gm IV (Very high INR or Dabigatran level – recheck TT/Dabigatran level post first 5)

For urgent management of bleeding independent of dabigatran, can consider at physician discretion either FEIBA with doses up to 25 units/kg ABW or TXA. Consider ordering dabigatran level.
