

Anticoagulation Education Documentation in MPER

1. Patient Education

a. EMR MPER documentation

- i. Choose the 'Patient Education' tab in the patient's chart
- ii. Select the 'Unresolved Education' tab
- iii. Select the 'Anticoagulation Therapy' title
 1. if not added to the title/topic list, add the education topic to the list
 - a. select 'Add Title' [bottom left of the screen]
 - b. search for "CPM S11 TOP EDI ANTICOAGULATION THERAPY (ADULT, OBSTETRICS)"
 - i. note, if you type "antic", the lone anticoagulation topic loads automatically
 - c. select all pertinent teaching points that apply

- iv. Select all applicable subtopics then "Accept"
- v. Select the "Multiple" button [bottom right of the screen]
- vi. Select the "Anticoagulation Therapy" teaching point
- vii. Select all points that apply to the 'Learner', 'Readiness', 'Method', and 'Response' categories
- viii. Select 'Accept' in the bottom right corner of the screen
 1. NOTE: for patients that are unable to receive warfarin education due to long term, incapacitating factors where family, significant other, or caregiver will not be available, MPER documentation must include 'Method' "E" and 'Response' "VU,U" and a 'Comment' simply detailing the patient's barrier to verbal education.
- ix. Select 'File' to complete the activity
