

Recombinant Factor VIIa in Congenital Cardiac Surgery

Dosed at 20 – 30 mcg rFVIIa/kg which may be repeated if necessary, in cardiac surgery associated with cardiopulmonary bypass to reduce blood loss and need for re-exploration.

If rFVIIa is needed, call 3rd floor pharmacy or CPCS pharmacist if 3rd floor pharmacy is closed.

Approved by UCDHS P&T Committee 2/2012.
