

## Special Seminar

**Vincent van Unen, Ph.D.**

Assistant Professor  
Department of Immunology  
Leiden University Medical Center

### "Disease-associated network analysis of immune cells in the intestine"

Vincent van Unen investigates human immune-mediated disorders in tissues. In this talk, van Unen will explore the identification of intestinal immune networks associated with chronic inflammatory disorders. As the first adopter of mass cytometry in the Netherlands as a Ph.D. student, van Unen will also discuss advanced high-dimensional spatial analyses as well as the use of human celiac disease and inflammatory bowel syndrome (IBS) autoimmune organoid models, offering new insights into intestinal diseases.

Thursday, July 24, 2025  
Tupper Hall 2133/2135  
1 p.m.
