

Arthur J. de Lorimier, M.D., C.P.E., COL(retired)

Philosophy of Care

As a 24 year veteran of Army Medicine I have come to recognize that healthcare is a team sport. As such, I actively seek the cooperative input of parents and primary caregivers in the care of my patients so that the therapeutic options I provide are practical and timely to the patient's needs. Coordination of care with other sub-specialists is essential to the care of my patients. I am willing to consider integrating non-traditional options in their care. I consider it a great honor to provide for the healthcare needs of children.

Clinical Interests

I care for patients with all forms of Pediatric gastrointestinal disorders to include feeding difficulties, motility disorders, functional disorders of the bowel, Inflammatory Bowel Diseases, and nutritional disorders.

As a Helms Medical Acupuncture trained physician, I provide acupuncture to appropriate patients as an adjunct to traditional treatments in the care of children with functional and motility disorders of the gut.

Research/Academic Interests

Dr. de Lorimier is interested in the study of functional and motility disorders of the gastrointestinal tract as well as integrating non-traditional forms of healthcare in the care of his patients.

Title Associate Clinical Professor of Pediatrics
Director of Endoscopy and Motility Program
Certified Physician Executive

Specialty Pediatric Gastroenterology

Department [Pediatrics](#)

Division Pediatric Gastroenterology and Nutrition

Center/Program Affiliation [UC Davis Children's Hospital](#)

Address/Phone Glassrock Building, Pediatric Specialty Clinics, 2521 Stockton Blvd. Suite 3200 Sacramento, CA 95817

Phone: 916-734-3112
