

## Edris Aman, M.D.

|                             |   |
|-----------------------------|---|
| Philosophy of Care          | I treat each of my patients as I would want my own family member to be treated. I thoroughly enjoy learning about my patients' lives and tailoring their cardiovascular care to their goals of care. My ultimate goal is to provide comprehensive compassionate care.   |
| Clinical Interests          | Dr. Aman is specialist in cardiovascular imaging; echocardiography (transesophageal, transthoracic, and intracardiac), cardiac computed tomography, and cardiac magnetic resonance. His special clinical interests include use of different imaging modalities, such as transesophageal echocardiography, intracardiac echocardiography, and/or cardiac CT, to guide minimally invasive structural heart procedures. He also focuses on use of cardiac CT to guide management of coronary artery disease. |
| Research/Academic Interests | Dr. Aman serves as Chief of Cardiovascular Quality Improvement and Patient Safety. His research interest is in cardiovascular imaging; specifically cardiac CT, cardiac magnetic resonance and echocardiography related to structural heart disease.  |
| Title                       | Health Sciences Assistant Clinical Professor in Cardiovascular Medicine   |
