

Sally J. Rogers, Ph.D.

Philosophy of Care

I specialize in working with parents of young children (3 and under) who have autism spectrum disorder and in working with parents with infants who are having difficulty with social interactions. I believe that parents and caregivers are the most important sources of learning and change for all young children, including those with ASD.

I also believe that a young child's daily routines with his or her caregivers are the most important learning environments and opportunities available. Working with young parents and other caregivers to support a young child's development of language, play, social communication, and happy participation in family life as part of everyday caregiving is very rewarding work for me because of the effects of daily interactions in everyday situations to support development and change.

Clinical Interests

Dr. Rogers' clinical interests include infants presenting with risk features of autism spectrum disorders; assisting parents with their young children with ASD; consultation with families or therapists when young children with ASD are not responding well to treatment; and difficult to treat children.

Research/Academic Interests

Dr. Rogers specializes in conducting research into autism and other developmental disorders, and treating patients who have developmental disabilities, especially young children with autism. She studies early developmental processes, including imitation, social-communicative behavior, development of motor skills, language and social interaction patterns. She collaborates on studies of autism in infant siblings, and is also involved in developing treatments and examining treatment efficacy in autism using a treatment model that she developed in collaboration with Geraldine Dawson, the Early Start Denver Model.

Her clinical interests include evaluation of cognitive, behavioral, social, emotional, and adaptive functioning; early intervention for children with autism; developing treatment and educational interventions for persons with autism of all ages; and social skills groups for adults with autism. Dr. Rogers has written extensively in her field, is an associate editor for Autism Research and serves on the editorial board of many publications, such as the Journal of Autism and Developmental Disorders, Topics in Early Childhood Special Education and Infants and Young Children.

Title Professor

Specialty Clinical Psychology, [Psychiatry](#), Neurodevelopmental Disorders, Autism

Department [Psychiatry and Behavioral Sciences](#)

Sally J. Rogers, Ph.D.

Division	Psychiatry
Center/Program Affiliation	UC Davis MIND Institute
Address/Phone	UC Davis MIND Institute, 2825 50th St. Sacramento, CA 95817
Additional Phone	Phone: 916-703-0264 Physician Referrals: 800-4-UCDAVIS (800-482-3284)
Email	sjrogers@ucdavis.edu
Education	Ph.D., Ohio State University College of Medicine, Columbus OH 1975 B.A., Ashland College, Ashland OH 1969
Internships	Orient State Institute, Orient OH 1973
Professional Memberships	American Association on Intellectual Disabilities American Psychological Association Autism Society of America International Society for Autism Research Society for Research in Child Development
Honors and Awards	Jacobson Award, Intellectual and Developmental Disabilities Division 33, American Psychological Association, 2013 Honoree at Breaking the Glass Ceiling Awards, The California Legislative Womens Caucus, 2013 American Journal of Nursing Book of the Year Award for Consumer Health for An Early Start for Your Child with Autism: Using Everyday Activities to Help Kids Connect, Communicate, and Learn, 2012 Autism Speaks Top 10 Science Autism Research Advances of 2012; Early Intervention Program Alters Brain Activity In Children with Autism: Clinical study of Early Start Denver model intervention shows that it improves not only social skills, but also brain responses to social cues, 2012 Time Magazine Top 10 Medical Breakthroughs Hope for Reversing Autism ESDM Therapy, 2012 Fellow, American Psychological Association, 2011 Dean's Excellence Award, UC Davis, 2010 Fulbright Senior Specialist, LaTrobe University, Melbourne, 2010 Research Award, UC Davis School of Medicine, 2008
