

Nayereh Pezeshkian, M.D.

Philosophy of Care	I consider the highlight of my work at UCDCMC the performance of a wide variety of complex invasive electrophysiologic (EP) procedures. Of great importance, our patients are experiencing arrhythmia-free survival off of antiarrhythmic drugs after ablation for atrial fibrillation and ventricular tachycardia.
Clinical Interests	Dr. Pezeshkian's clinical interests are Cardiac electrophysiology, the science of elucidating, diagnosing, and treating the electrical activities of the heart. She is also interested in performing a wide variety of invasive procedures including mapping and ablation of SVT, VT, and atrial fibrillation; device implantation including cardiac resynchronization.
Research/Academic Interests	Dr. Pezeshkian's research interests focus on ventricular tachycardia in a normal heart and sudden cardiac death.
Title	Professor
Specialty	Cardiovascular Medicine , Cardiac Electrophysiology
Department	Internal Medicine
Division	Cardiovascular Medicine
Center/Program Affiliation	Cardiovascular Services Coronary Heart Disease Reversal Program
