

## Nayereh Pezeshkian, M.D.

<b>Philosophy of Care</b>	I consider the highlight of my work at UCDCM the performance of a wide variety of complex invasive electrophysiologic (EP) procedures. Of great importance, our patients are experiencing arrhythmia-free survival off of antiarrhythmic drugs after ablation for atrial fibrillation and ventricular tachycardia.
<b>Clinical Interests</b>	Dr. Pezeshkian's clinical interests are Cardiac electrophysiology, the science of elucidating, diagnosing, and treating the electrical activities of the heart. She is also interested in performing a wide variety of invasive procedures including mapping and ablation of SVT, VT, and atrial fibrillation; device implantation including cardiac resynchronization.
<b>Research/Academic Interests</b>	Dr. Pezeshkian's research interests focus on ventricular tachycardia in a normal heart and sudden cardiac death.
