

## James Paul Marcin, M.D., M.P.H.

### Philosophy of Care

Caring for seriously ill children and supporting families are my passion. I do all that I can to treat every ill child how I would want my own children cared for, and consider it a privilege and honor to be part of the incredible team at our Children's Hospital.

### Clinical Interests

Dr. James Marcin practices in the Pediatric Intensive Care Unit at the UC Davis Children's Hospital. Dr. Marcin is also the Director of the Center for Health and Technology and leads the telemedicine program.

Dr. Marcin is particularly interested in how telemedicine consultations can help in the care of seriously ill pediatric patients in remote hospitals, emergency departments and inpatient wards.

### Research/Academic Interests

Dr. James Marcin completed his pediatric critical care fellowship at the Children's National Medical Center in Washington D.C. He also completed a masters degree in public health at the George Washington University.

Dr. Marcin conducts research on a variety of public health issues in pediatric emergency and critical care medicine, including quality of care, severity of illness measures and telemedicine. His recent research has focused on how telemedicine can be used to address disparities in access to pediatric subspecialty care, improve the patient-centeredness of care, increase quality of care, and reduce overall healthcare costs. He currently is the director of the largest pediatric tele-emergency network in the country.
